EXPERIENCE

GeekSSort

Junior Software Engineer

Mirpur, Dhaka

Feb. 2026 – Present

- Led the design and development of **120+ production-grade APIs** using **NestJS, Prisma, TypeORM, PostgreSQL, and Redis**, applying Clean Architecture and SOLID principles to build scalable, maintainable, and microservice-ready backend systems.
- Developed and maintained **50+ production-grade APIs** using **Django, Django REST Framework, PostgreSQL, Redis, Celery, and Docker**, delivering secure and high-performance backend services for business applications.
- Built a high-performance **full-stack real-estate platform** with **Next.js, NestJS, GraphQL, PostgreSQL, and Redis**, optimizing SSR/SSG, SEO, caching, and data flow for a fast and scalable user experience.
- Engineered robust backend systems with **JWT authentication, RBAC, API rate limiting, Redis caching, and advanced query optimization**, ensuring security, scalability, and stability under heavy traffic.
- Delivered multiple **client-facing production applications** using **Shopify, Headless Shopify (Hydrogen / Storefront API), and Framer**, focusing on performance, conversion optimization, and modern headless UI/UX architecture.
- Successfully delivered an **enterprise-grade Barbershop Management System** using **NestJS, PostgreSQL, Prisma, and Redis**, implementing **DDD, modular architecture, appointments, services, billing, inventory, employee management, and attendance tracking**, with **ZKTeco biometric fingerprint device integration via SDK** and a **real-time event-driven attendance synchronization pipeline** using a **NestJS WebSocket Gateway**.
- Currently designing and developing the backend architecture of a **SaaS-based multi-vendor POS system** using **Django, Django REST Framework, PostgreSQL, Redis, and Celery**, with **multi-tenant, multi-vendor, and branch-level support** for scalable vendor operations and centralized system management.

GeekSSort

Software Engineer Intern

Mirpur, Dhaka

Oct. 2025 – Jan. 2026
